INSTRUCTIONS & REQUIREMENTS

To apply for an Operating Permit Amendment, a complete application must be submitted – one paper application and one electronic application (either via email or on disk). A complete application consists of the following items:

1. Completed application form. Both sides must be completed and must have original signatures.

2. Proof of land ownership:
   - Current title report
   - Current report from a licensed title company that may be referred to as a trio, listing packet, or consumer information report. (This report may be obtained free of charge.)

3. $1,260 application fee. The fee is non-refundable.

4. Reclamation and development plan. The Reclamation Plan Guidelines may be used for this purpose.
   The required attachments or enclosures should include site plans, cross sections, aerial photographs, or other documents needed to show the present condition, planned development, and final configuration. Refer to Reclamation Plan Guidelines, Section H, for mapping requirements.

**NOTE:** You must provide DOGAMI with an original and 1 copy of any document larger than 11 x 17, in addition to the electronic copy.

Your reclamationist will process your application and may contact you to schedule an inspection and is available to answer questions concerning the map requirements, reclamation plan, etc. Once all application items have been received, DOGAMI will prepare an evaluation of the project, make recommendations on permit conditions, and then circulate this information to other natural resource agencies for their review and comment.

If land-use approval has not been obtained, it may take up to 165 days after a complete land-use application is filed with the appropriate land-use agency before we can issue our permit. The permit may be issued during the 165-day period if land-use approval is obtained.

**Reclamation security is required for all Operating Permits (ORS 517.810).** The department typically determines the amount of this bond or security after the application has been submitted and DOGAMI has inspected the site. The amount shall not exceed the actual cost of reclamation of land forecast to be mined during the next 12 months in addition to that land presently disturbed, subject to reclamation, and unreclaimed. Forms to be used for reclamation security will be provided to you upon receipt of a completed application.

If you have questions, please contact us at (541) 967-2039 or info@mlrr.oregongeology.com.
