Rig: Cable tools; prob deepened w/rotary.

Surf. fm: Coaledo.
Shows: Oil & gas-unverified.
Logs: G&MI Confidential File.
Devel/Hist.: Promoted in stock selling setup by John Ewell & associates. Abandoned due to lack of funds @ 1476'. Taken over by Coast Oil Co. & deepened to 3900'; had to undercut & carry 6" csg. to TD. Hit good shows of oil & gas but couldn't test them due to casing trouble. This test the basis for drlg 4 other wells in the area to produce gas for the city of Coquille. Gas produced from sh @ depths of 1500-1900'.
Structure: Pulaski Arch, line of folding shown on J.S. Diller's USGS folio of Coos Bay Quad.
Summary: Fat Elk promotional well, abandoned due to lack of funds. Coast Oil Co....sounds like a promotional well; supposedly had 200' of oil in 6" csg. at one time. Abandoned due to csg. troub
R.E.Stewart: 3 gas shows in upper 915'. From 915' to 1476 in blue & gry diatom. sh. w/pet. content. Rept. says there was 1 pronounced gas show & def. oil & gas shows. Long in Con. File 0-2255' w/oil & gas shows. Est. 750 MCF/d from 1650 unverified
