Mr. W. I. Nissen  
Research Supervisor  
U.S. Bureau of Mines  
Salt Lake City Research Center  
729 Arapeen Drive  
Salt Lake City, Utah 84108

Dear Mr. Nissen:

I am interested in your work on the recovery of lithium from clay deposits in Oregon and Nevada. I would appreciate any information you could send describing this research.

Our monthly magazine, Oregon Geology, is available for rapid publication of information on the mineral resources of Oregon and we would be pleased to consider publication of any summary papers describing the lithium resources.

Sincerely,

Donald A. Hull  
State Geologist
