Leasing is continuing in Klamath and Lake Counties of geothermal prospects by four companies. A recent tax decision regarding change of land status because of mineral leases has many ranchers in a quandary as to whether leasing will be a gain or a loss to them. The Legislature is considering a bill now which would exempt mineral leases in determining land use classification.

Texaco, Inc.  No dope Drilling ahead after setting 10½" Federal 1 hole intermediate casing string.
Permit 63 Security regarding information Sec. 31, T. 17 S., R. 23 E. on this test is the tightest of Crook County any wildcat ever drilled in the State; however, the Texaco drilling superintendent is greeting visitors cordially and conducting tours of the operation.

A hearing was held at the regional office of the U.S. Bureau of Land Management in Portland on October 21, 1971 to review a request by the Oregon Environmental Council to shut down the Texaco drilling until a complete environmental impact statement is filed with the Federal Environmental Protection Agency. Mr. Archie Craft, Regional Director of the Bureau of Land Management, told the group that no major action was involved in this instance so an impact study was not necessary. The problem was resolved at the hearing and the Oregon Environmental Council conceded that a shut-down probably was not necessary but its representatives were able to obtain an agreement from Mr. Craft that a full impact statement would be forthcoming in the event Texaco made a discovery (this is probably a precedent for oil operations on land areas in the U.S.).

OREGON - Offshore

Texaco, Inc., extended its geological and geophysical exploration permit to April 1972 on federal OCS lands off the coast of Oregon.

WASHINGTON - Onshore

State lands in Pierce and King Counties awarded through competitive bidding brought between $1.00 and $3.25 per acre from Cities Service Oil Company and Trend Exploration, Ltd. Standard, Mobil, and Union hold sizable lease blocks in northwestern Washington.

WASHINGTON - Offshore

No activity reported in October.
OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

Standard Oil Company is conducting seismic studies in the Snake River Basin of western Idaho and eastern Oregon. Numerous gas shows in the basin have stirred many past drilling ventures.

Texaco has released the Loffland Bros. rig at its Crook County site. Loffland reportedly obtained a contract in the Rocky Mt. area. No more drilling is anticipated by Texaco in Oregon in the near future.

At the beginning of each new year it is customary to speculate on prospects for future exploration but the future of domestic exploration is in a precarious state with all of U.S. lands essentially under freeze to oil exploration. The freeze includes Alaska, the Pacific continental shelf, the Atlantic continental shelf, and now the requirement that if any substantial objection is raised concerning oil development on federal lands anywhere, a complete environmental study is to be made. Similar studies in Alaska have delayed work there for the past four years. The fact is that beginning in 1972 no oil exploration is authorized on federal lands without the prospect of costly, lengthy delays.

OREGON - Offshore

Texaco, Inc. Offshore exploration permit April 1972 (federal)
Standard Oil Company Offshore exploration permit Aug. 1973 (state)

WASHINGTON - Onshore

Union Oil is reportedly planning another test in Grays Harbor County. The last drilling done by Union in Washington was on submerged lands near Grays Harbor.

WASHINGTON - Offshore

No activity last month.
OIL ACTIVITY IN THE NORTHWEST

OREGON

Loffland Bros. Drilling Company, contractor on the Crook County Texaco hole, has received the contract to drill for Mobil Oil in northwestern Washington. The rig was stacked at the Texaco site until recently.

There are 150,000 acres of oil and gas lease applications covering lands in eastern Oregon awaiting approval of the U.S. Bureau of Land Management. The regional office is awaiting a decision from Washington on impact statements.

A hearing on proposed geothermal regulations is scheduled at Klamath Falls on February 29, 1972.

A National Oceanic and Atmospheric research team has discovered a deep sedimentary trench on the continental slope of Oregon and Washington. The sedimentary basin holds prospects prospects for oil deposits but water depth is 5000 to 6000 feet in that region (The Oregon Journal, Feb. 8, 1972).

State Permit 62
API No. 36-045-00022
SW 1/4 sec. 34, T. 37 S., R. 41 E.
Malheur County

Permit issued Sept. 7, 1972. Standard applied to DEQ Oct. 12, 1972 for a waste disposal permit and a solid waste management permit. A hearing on these permits is scheduled for Nov. 30, 1972 at the Public Service Bldg. in Portland. Depending upon comments received, the DEQ will issue conditional permits similar to those given to Texaco for its Crook County drilling in 1971 with the understanding that the Bureau of Land Management will proceed with a 102 programmatic environmental impact statement for the drilling. In the meantime the USBLM has agreed to initiate a state-wide 102 impact statement for drilling in Oregon as well as making an environmental analysis of the Standard Blue Mt. site. The EIS for the state is scheduled to be completed by January 1, 1973. DEQ and the BLM further agreed that if a discovery is made further work will be halted until a 102 statement has been made for each specific site.

Industry is watching closely the Oregon discussion as forthcoming discussions can have national significance.

Texaco applied for another 30,000 acres of federal oil and gas leases located in the southwest corner of its Crook County lease block. No decision will be made on the application until the USBLM has completed its state-wide impact analysis. This should be released sometime this winter. There are now approximately 276,000 acres of oil and gas leases pending action by the BLM ($132,000 in annual rentals). AMOCO Production Co. reportedly withdrew its application for 18,840 acres of federal leases in Crook County which have been pending approval since October 1971.

OIL AND GAS ACTIVITY IN THE NORTHWEST

OREGON

No drilling activity this month. The Texaco Crook County records were released in November and news media reported the noncommercial gas shows encountered in Cretaceous sandstone. Texaco has maintained its lease block and has reportedly been acquiring new leases this past summer.

There is still a moratorium on oil and gas leasing on Federal lands in Oregon. The ban has been in effect since October 1971 when the State Department of Environmental Quality requested impact proceedings be initiated before any more leases were issued. A total of 498,000 acres of leases have been tied up for 2 years and the matter is still to be resolved. The ban on leases affects only lands in Oregon. Leasing and drilling on Federal lands are going ahead at a rapid pace in other states.

Gulf has postponed drilling this well until next spring because of weather and because they decided to move in a bigger rig. Depth capacity of the Big Chief equipment was 6000'.

Plugged and abandoned 11-15-73. Big Chief rig released.

Magma will not drill this prospect until Federal lands are opened to leasing.
OIL AND GAS ACTIVITY IN THE NORTHWEST

OREGON

No drilling activity this month. Officials from this Department, Division of State Lands, Department of Environmental Quality, and the U.S. Bureau of Land Management met December 10, 1973, to resolve the difficulties between State and Federal agencies related to leasing Federal lands for oil and gas minerals. Secretary Rogers Morton issued a moratorium on leasing in Oregon until the question of impact statements was resolved. Leasing activity under this order has been frozen since November 1971. The group decided that the problem could be resolved by Governor McCall. It was suggested that he write Secretary Morton stating that Oregon would accept the USBIM procedure, or, if he still believes impact statements are mandatory for drilling, that he should write and urge Secretary Morton to expedite the national and state impact statements.

Northwest Natural Gas Co. has laid plans to import liquefied natural gas into a terminal located at the coastal town of Newport. Facilities would include storage for 500,000 barrels of liquefied gas from southwestern Alaska. The project will involve transportation of gas in a specially built tanker with estimated capacity of 180,000 barrels from Kenai, Alaska to Newport. Shipping will reportedly be done by Global Marine Development, Inc., Los Angeles.

4000' T.D. Encountered gas shows in lower portion of hole but noncommercial. Abandoned in late November.
OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

No activity in February. Texaco, Mobil, and Standard are expected to continue field studies in Oregon in 1974 with the possibility of one deep hole being drilled this summer.

The Federal leasing moratorium is still in effect in Oregon after nearly 2½ years of bureaucratic delays. Governor McCall and the Secretary of the Interior have agreed to resolve the matter as is done in other states by making an environmental analysis on a well-by-well basis. The Oregon office of the BLM reportedly has only four field men to make analyses of proposed drilling locations for oil and gas and for geothermal. With nearly one million acres of new geothermal lease applications on file and prior outstanding applications on 300,000 acres of oil and gas leases, the reviews will apparently take several years.

OREGON - Offshore

William E. Grant, manager of the Pacific Coast OCS office for the Bureau of Land Management, met with State and Federal natural resource agency representatives in Portland last month. Purpose of the meeting was to discuss future offshore mineral exploration in Oregon and Washington. The Interior Department has asked for comments to be submitted by May 1974.

Governor McCall received a reply from the office of the Secretary of the Interior in February regarding the Oregon lease moratorium. The reply stated that Oregon would have to agree with the procedure used in other states or wait until the national and state impact statements can be prepared. The Governor's reply, late in March, stated he would still insist on impact statements.

The delay in issuing leases has continued for 2½ years and will undoubtedly continue for many more months. Loss of rentals on pending leases totals $250,000, and 100,000 acres of lease applications have been withdrawn since the start of the moratorium without any rental being paid.

OREGON - Offshore

No activity. Oregon and Washington are being considered by the USBLM in future OCS lease sales.

OIL ACTIVITY IN THE NORTHWEST

OREGON — Onshore

No new applications were received last month for oil and gas drilling.

Far West Oil of Portland has been putting a lease block together in Yamhill County. The firm is believed to be speculating on increased exploration interest in Oregon. Tri-Tex Corporation of Sidney, Nebraska has reportedly assembled several thousand acres of leases northeast of Burns, and Texaco has been filling in its lease block in Crook County with private lands.

Mobil, Standard, and Texaco have been actively engaged in exploration in Oregon during the last three years.

OREGON — Offshore

Texaco and Standard are maintaining exploration licenses off the Oregon coast apparently anticipating a renewal of activity in that region.

Comments by USBIM members on future offshore Federal lease sales indicate that Oregon and Washington are at the bottom of the list; southern California and western Alaska are near the top.

Gulf Research and Development Co.
Geophysical Program

Gulf Research has filed notice to drill approximately 40 shallow geophysical holes.
OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

Mobil Oil Company filed applications with the USBLM for 79 leases in Oregon. Mobil's applications covered nearly 200,000 acres in Coos, Linn, Lane, and Douglas Counties. No leases have been granted in Oregon since October 1971 when a moratorium was declared on Federal lands in the state pending an environmental report. There are currently 300,000 acres of pending lease applications and 221,000 acres under lease in Oregon affected by this moratorium.

OREGON - Offshore

No activity.

WASHINGTON - Onshore

El Paso Products Co.
Forks Area
Clallam County

El Paso Products Co.
Montesano Area
Grays Harbor County

Will begin early in September. Signal Oilfield Services of Denver is the contractor.
This hole is to be drilled after the Forks well. El Paso reportedly has a program for several wells in western Washington.

Shell Oil Co. applied for 47 Federal leases in Grant, Benton, Yakima, and Kittitas Counties of eastern Washington in August. These are the first applications for Federal leases in eastern Washington in many years.

WASHINGTON - Offshore

No activity.

IDAHO

Wildcat
Payette area
Payette County

Being drilled by an independent. Will obtain information for next month's report.
OREGON

Magma Energy, Inc.
La Grande No. 1
NW 1/4 sec. 9, T. 4 S., R. 39 E.
Union County

Set 13-3/8" 54# surface casing at 712'. Cemented casing to surface with 1038 sacks of construction cement. Department witnessed BOP equipment tests - O.K. Projected depth 5000'.

Gulf Research & Development, Inc.
Lake County

Began drilling temperature gradient holes and conducting seismic studies.

The USBIM has received 773 geothermal lease applications covering 1.6 million acres in Oregon since January 1, 1974. More than 200 applications were rejected because of a 50% overlap. Therefore, they must go to competitive bidding. Late in August the Bureau issued Oregon's first Federal geothermal lease to Republic Geothermal, Inc., of California. The lease was for 1347 acres near the town of Vale.
Intra-office information only
not for publication

OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

Mobil Oil Co. has had a field crew working in southwestern Oregon this summer and the company applied for 200,000 acres of Federal leases last month.

OREGON - Offshore

No activity last month. Several inquiries were received, however, about the possibility of opening the area again.

WASHINGTON - Onshore

El Paso Products Co.
Montesano #1
NW 1/4 sec. 13, T. 17 N., R. 18 W.
Grays Harbor County

The company had problems drilling through the cover of glacial till. The first attempt was abandoned and the rig skidded to another location. Signal Oil Field Services, Denver is contractor.

IDAHO

Anschutz Corp.

2,730' TD

Ran logs and hole caliper. Plugged and abandoned 9-24-74. Temperatures not high enough. Taylor Drilling Co., Chehalis, Washington is contractor. Magma is moving rig to location near Cedarville, Cal. After finishing this hole Magma plans to return to Vale, Oregon.

Gulf Research & Development
Temperature gradient holes

Gulf drilled approx. 40 temperature gradient holes and 2 or 3 lines of seismic holes in Warner Valley. W.W. Drilling & Service Co. of Eugene was contractor.
OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

The last oil and gas drilling permit was issued to Standard Oil Company of California in September 1972 for its Blue Mountain Federal Unit well in southeastern Malheur County. The latest development has been the large-scale leasing by Mobil Oil Company in southwestern Oregon this past year. Mobil was reported to be acquiring leases in the southern Willamette Valley last month.

Texaco has maintained its leases in Crook County since abandoning a wildcat near Paulina in October 1971.

OREGON - Offshore

Gulf Oil Company applied to the Division of State Lands and the U.S. Geological Survey last month to run air gun surveys off the coast of Oregon. Texaco, Inc., and Standard of California have maintained offshore geophysical licenses in Oregon for several years.

WASHINGTON - Onshore

El Paso Products Co. Montesano #1 NW¼ sec. 13, T. 17 N., R. 18 W.
Grays Harbor County

El Paso Products Co. Montesano #1-A

300' Twisted off in glacial gravels. Skidded rig over and began new hole.

2200' Drilling ahead. Signal Oil Field Services is contractor.

Shell Oil Company initiated a large-scale leasing program in central Washington in Benton, Grant, and Kittitas Counties during September. The company has reportedly assembled 100,000 acres of leases. Texaco has joined the leasing by taking options on 25,000 acres. The activity appears to be in the central Columbia Basin. Objective of drilling must lie below the Miocene lavas at depths of 7000 to 8000 feet. Natural gas was produced from porous Miocene lavas at Rattlesnake Hills for several years preceding World War II.

GEOThermal ACTIVITY

Gulf Research & Development Pittsburgh, Pennsylvania

Completed drilling 40 300-foot temperature gradient holes in Lake County by September.

Interest in leasing continued at a high level last month but no drilling was done during that period.
OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

Mobil continued leasing in the Willamette Valley in December. Calls from landowners indicated the leasing ranged from Springfield north to Salem. Mobil also negotiated for leases northeast of the town of Lebanon last fall.

Ray Rentz, Janet Dorman, and David Porson of Denver, Colorado, filed on Washington and Columbia County leases dropped by Standard Oil Company last September. The lease block encompasses approximately 15,000 acres.

OREGON - Offshore

Gulf Oil applied to the Division of State Lands for a permit to conduct air gun seismic surveys along the Oregon coast.

WASHINGTON - Onshore

El Paso Products Co. 6920' T.D. Plugged and abandoned. Montesano #1-X Bottomed in Eocene volcanics. NWsec. 13, T. 17 N., R. 8 W. Grays Harbor County

Shell Oil Company and Texaco, Inc., have taken leases in southeastern Washington in the Columbia Plateau. Objectives are pre-Miocene sedimentary rocks. Low pressure gas was produced from the shallow Rattlesnake Hills gas field between 1929 and 1942. The new leases are in the area of the Rattlesnake structure.

GEOTHERMAL ACTIVITY IN THE NORTHWEST

The Bureau of Land Management announced its schedule for competitive leasing of geothermal KGHA's in Oregon for 1975-76. (See the list in Dec. 1974 Ore. Bin.)

The Bureau of Land Management offered competitive leases on the Beowawe, Hot Springs Point, and Brady-Hazen KGHA in Nevada last month. The area being auctioned totals more than 30,000 acres. A lease sale was held in September 1974 covering lands in the Brady-Hazen KGHA. Successful bidders paid $30,000 for 4250 acres (The International Geothermal Energy Newsletter).

Magma, Inc., finished testing its well in Surprise Valley in November. The company reportedly has moved to Idaho to drill a geothermal prospect. The company was expected to return to Vale, Oregon this winter to drill leases there.
OIL ACTIVITY IN THE NORTHWEST

OREGON - Onshore

Mobil continued to add to its leases last month in western Oregon. Mobil applied for 40,000 acres of state lands scattered from Roseburg north to Salem.

OREGON - Offshore

No activity last month. The U.S. Department of Interior announced its offshore leasing schedule late in 1974. Oregon and Washington were included in Sale Area 57, which would be up for lease in October 1975. The offering would include all of the Washington coast and only the southwest portion of the Oregon coast, believed to be the least attractive of the Oregon shelf lands (The Oregonian, Nov. 16, 1974).

WASHINGTON - Onshore

El Paso Products Co. 5700' Drilling. Planned depth of 6000'. Lacy No. 22-1 Contractor, Signal Oil Field Services. Sec. 22, T. 26 N.; R. 13 W. Jefferson County

Northwest Pipe Line Corp. Gas storage test holes
Lewis County

The company has drilled 3 of the 5 holes planned - and reportedly have outlined a good prospect in T. 12 N., R. 1 E. Drilling contractor is Jack Taylor of Chehalis, Washington.

Shell Oil Company is continuing to build its oil and gas acreage in eastern Washington. A total of 4200 acres of Federal leases were applied for in October.
Don Hull, of the Department, announced plans to extend gradient drilling northwestward along the Brothers Fault zone. Eleven 500-foot holes will be put down between Glass Buttes and Newberry Crater.

Cemented 9-5/8" surface casing at 250'. Plans are to drill to 2000'. This is a geothermal test well (deep well permit - $10,000 bond).

Preparing to spud. This will be a 7500' geothermal well. San Juan is drilling under a "Farm-out Agreement" with Gulf Oil Co. (Gulf owns the lease – San Juan obtains an override on royalty). Contractor is Geo Drilling Co., Phoenix, Ariz.

Hydro-Search, Inc., will conduct geophysical surveys to evaluate geothermal prospects in Harney and Malheur Counties. The company applied to explore on Federal lands.

NE± sec. 10, T. 23 S., R. 29 E.
Harney County

The permit for this hole was issued in May 1976. Reichhold reportedly wants a partner to drill its Oregon leases so has postponed drilling indefinitely. Will drop from activity report until new action occurs.

Drilling has been postponed until next spring at least because essential federal leases have not been issued.

Champlin Petroleum, Inc., Denver, is continuing to build a lease position along the northwestern border of the Western Snake River basin in Malheur County. The company apparently is planning its own exploration and is not just speculating on major company drilling programs.

Gas Producing Enterprises, Inc., Denver, Colorado, began leasing in Coos County in November. It is believed that Phil Brogan, Jr., is consulting geologist for the firm.

USBLM Lease Sale
December 9, 1976

Republic has postponed drilling of two proposed deep geothermal tests near Vale. The holes were to be drilled as "farm-outs" on Magma Energy leases.

The USBLM will re-offer leases not bid on in earlier sales on Dec. 9, 1976. The leases to be re-offered are located in:
Vale KGRA
Crump Geyser KGRA
Klamath Falls KGRA
Summer Lake KGRA
Proposed to drill four 500-foot gradient holes in the Succor Creek area, Malheur County, T. 22-26 S., R. 46 E.

Proposed to drill five 500-foot gradient holes as an extension of the Western Cascade project:

(1) SE\(\frac{1}{4}\) sec. 11, T. 15 S., R. 6 E.
(2) NE\(\frac{3}{4}\) sec. 28, T. 15 S., R. 7 E.

American Quasar, Denver, Colorado, world's largest drilling fund company has acquired nearly 200,000 acres of oil and gas leases in NW Oregon and SW Washington. The company will reportedly announce its 1979 drilling program early in July. Exxon and Chevron Resources are also reported to be leasing in NW Oregon.

Champlin Petroleum Co., Denver, Colorado filed 50,000 acres of federal oil and gas leases in June. The leases are located in Wasco and Gilliam Counties. There now is more land leased for oil and gas minerals than ever before in Oregon. Total acres under lease are in excess of 2 million acres.

OIL AND GAS ACTIVITY

January 9, 1979

Ag Oil of Oregon
Hay Creek Ranch No. 1
State Permit No. 76
API No. 36-031-20002
NW¼ sec. 23, T. 11 S., R. 15 E.
Jefferson County

Reportedly planning to spud by the end of January, 1979.
Proposed depth 5,500'. Ag Oil has also filed for a second
permit to drill in this area.

Farnham Chemical Company
State Permit No. 78
W. Smith No. 1
NW¼ sec. 32, T. 11 S., R. 1 W.
Linn County

Reported to be ready to spud in February 1979.
Proposed depth 4,500'.
Farnham has obtained permits for five other
holes in Linn County.

Mobil Oil Company
Sutherlin Unit No. 1
State Permit No. 75
API No. 36, T. 24 S., R. 5 W.

Drilling ahead. Brinkerm
hoff Drilling Company, contractor, Denver, Colorado.
Mobil has obtained permits to drill two more holes in
Linn County.

Coos County held an oil and gas lease sale covering 13,000 acres of County
lands on December 21, 1978. Norton Oil Company, Springfield, Oregon was the
only bidder for the leases. No bonus was bid, only a minimum of $1 per acre
annual rental was offered by Norton.
