Dear Mr. Sodorff:

Please find enclosed a map showing proposed exploration drill hole locations for the Alkali Lake Basin and Summer Lake Basin. Geographic descriptions for these holes are listed below and all locations are on BLM administered land.

I spoke with D. Simintachi late last week and mentioned that this letter and map were being sent. As drilling procedure and project goals are identical to those detailed in the Christmas Valley/ Fort Rock Valley Exploration Proposal (7/12/84) I am not sending another proposal. If this is a problem, please let me know. Drilling will tentatively commence on the following holes starting about 8/27/84.
