EQUIPMENT ON PROPERTY

J. J. LIDDY PROPERTY

CONNOR CREEK DISTRICT:

Prescott--6/1/37---In the same vicinity ~~and~~ as the Connor Creek Mine and is developed by several tunnels with bodies of \$10 ore showing. It is at present being further developed by Professor J. J. Liddy, who has every confidence that he is going to develop a real mine in the near future.

LIDDY GROUP

The Liddy Group.—Between one and two miles south of the Runner group are the claims owned by J. J. Liddy. The vein, in places several feet wide, has been subjected to a great deal of movement which has produced much sugary quartz. On account of the movement and faulting there is much difficulty in following the vein. Tetrahedrite occurs in the vein in small amounts. The gold values were not ascertained.

LOOKOUT -

LIDDY GROUP (Gold-Silver)

Connor Creek District

"Between 1 and 2 miles south of the Snake River Mining Company's property and about 1 mile north of the Connor Creek Mine, in sec. 34, T. 11 S., R. 41 E., at an elevation of about 3,500 feet, is a group of claims owned by J. J. Liddy. The vein in places is several feet wide. It has been subjected to a great deal of movement, which has produced much sugary quartz. On account of this movement and faulting, there is much difficulty in following the

vein. The gold values were not learned, but small bunches of tetrahedrite were observed in the vein."
