It is reported that the **Ibex** mine located north of Sumpter in Baker County, Oregon, is being reopened by W. C. Fellows of Sumpter and associates, and gold shipments to the Tacoma smelter are expected to start soon. Several carloads of gold ore were shipped from the mine in the fall of 1941, but production was discontinued during the winter months.

A promising ore shoot is reported to have been opened in the Ibex mine on the Grant-Baker County line in Oregon by the **Ibex Gold Mining Company**, W. C. Fellows of Baker, Oregon, manager. Several carload shipments have been made to a smelter in Utah from the new showing. Ten men are employed.

## Oregon

The 35-ton mill at the **Snow Creek** mine is being moved to the **Bald Mountain** property which is being reopened by W. C. Fellows of Baker, Oregon. The Snow Creek is a gold property in the Greenhorn district, owned by W. A. Fenstermacher, 1211 South East Fifty-second Street, Portland, and was last operated by C. W. Cooper of Portland and associates. The Bald Mountain ore is siliceous and is therefore in demand at the Tacoma smelter. Mining equipment has been installed and some production is being made. However, when the mill is in operation output will be boosted.

**Oregon**

It is stated that three cars of high-grade gold ore have been shipped from the **Bald Mountain** mine in Baker County, Oregon, and another will be ready shortly. The property, which now is being operated by W. C. Fellows, Baker, is opened by a tunnel of over 1,700 feet. Production is shipped to the Tacoma smelter.
