

5/3/39

WOLFE PROSPECT

Virtue Dist. Baker Co

Owner: H. O. Wolfe, Baker.

Location: On south side of Virtue flat, Virtue District, $\frac{1}{2}$ mile south of Flagstaff Mine.

Geology: One 20-foot tunnel has been driven in a vertical vein striking N. 85 W. from 3 to 18 inches in width composed of calcite predominately, with minor amounts of quartz limonite and manganese oxide. The country rock is a silicified metagabbro.

Remarks: Mr. Wolfe is sacking ore from this vein for shipment, but no assays have been made, and it is doubtful if they will be of shipping grade.

John Eliot Allen.
