

DESCRIPTION OF PROSPECTS

GRAY COPPER No. 8 (Cu,Co,Ni)

Owner: Leda Kent

Area: 1 lode claim

Location: The claim is located northeast of the Hurt cabin about  $1\frac{1}{4}$  miles on the trail extending to the North Fork of Collier Creek in sec. 1, T. 37 S., R. 12 W. The location cut is about 500 feet due east of the trail and some 200 feet lower. Elevation at the cut is 1530 feet by aneroid.

Geology & Development: Development work consists of one drift, trending N.  $10^{\circ}$  E., now caved. The size of the dump indicates that the drift was possibly 50 feet or more in length. Rock in the vicinity of the drift is largely massive serpentine with some sheared serpentine.

The dump consists of gossan with magnetite and some malachite. A grab sample (P-11965) from the dump consisting of magnetite and malachite assayed as follows: Au-0.08 oz./T., Ag-trace; Cu-1.0%; Co-0.10% and Ni-0.50%.

DESCRIPTION OF PROSPECTS

GRAY COPPER No. 10 (Cu, Co, Ni)

Owner: J. B. Myers, Gold Beach, Oregon

Area: 1 lode claim

Location: The claim is located on a series of benches a few hundred feet above the North Fork of Collier Creek in sec. 36, T. 36 S., R. 12 W. It is located just above the trail extending from the Hurt cabin to the North Fork of Collier Creek about 1-3/4 miles from the Hurt cabin. Elevation of principal cut--1975 feet.

Geology & Development: Development work consists of two small cuts in serpentine. One cut which is located just above the trail shows no mineralization whatsoever. A second cut, about 60 feet in elevation above the first is 15 feet long and 4 feet wide and exposes pieces of magnetite with minor malachite. Magnetite is reported to occur at several places on the hillside above this cut. A grab sample (P-11967) of the magnetite from the dump assayed as follows: Cu-3.90%; Co-0.10%; and Ni-0.20%.
