Owner: Earnest D. Riddle, Riddle, Ore. Sold to J. T. Hubbard and associates of Riddle on a purchase contract.

Location: SE\(\frac{1}{4}\) SW\(\frac{1}{4}\), SW\(\frac{1}{4}\) SE\(\frac{1}{4}\) sec. 32, T. 30 S., R. 6 W., and Lots 2 & 3, sec. 5, T. 31 S., R. 6 W., on ridge between Council and Cow Creeks; 5\(\frac{1}{2}\) miles southwest of Riddle.

Area: 166.24 acres of patented ground.

History: This property was taken as a homestead. Later placer gold was found which has been worked in a small way for years. Mr. Hubbard is the first to try it on a large scale.

Geology: The gold is fine and closely associated with quartz, in fact the presence of gold can almost be determined by the presence of quartz. This gold has been deposited in the Umpqua formation. The bedrock is conglomerate. 100 acres of possible placer ground indicated but not tested. In one place it shows to be 60 feet deep. The values are fairly well distributed throughout the gravel with very little overburden. Gold runs about 900 fine.

Mining Conditions: 3\(\frac{1}{2}\) miles of ditch was constructed to bring water from Council and Cold Creeks to the property under a 200 ft. head. Mr. Hubbard thinks he will have enough water for a 3 to 3\(\frac{1}{2}\) nozzle \(\frac{1}{4}\)\text{"}\. Not enough snow to interfere in the November to May mining season.

Equipment: No. 1 giant and 800 ft. of 10-24 inch pipe. Mountain topography. Elev. 1400 ft. aneroid. Timber on about half of the placer ground.

J.E.M. 8/1/39.
