Name: Gopher Mine (Quicksilver)

Owner: Guy Pennell, Tiller, Oregon.

Location: 1½ miles northwest of Boulder Creek bridge in Sec. 12, T. 29 S., R. 1 W. 12 miles N.E. of Tiller, Oregon. On the north side of the third creek, on west side of Boulder Creek and one-half mile west of Boulder Creek. The topography is not correct on U.S.F.S map. The claim is shown in Sec. 11 while actually it is in Sec. 12.

Area: 20 acres. Located August 27, 1936.

Geology: Rhyolite country rock which carries cinnabar. The area runs N. 40° W. and cinnabar can be panned for a distance of 1000 ft. The width is not known. Four samples were taken. Two from the discovery tunnel and two from an open-cut about 600 ft. N.E. of discovery cut. All four samples run a trace.

Miscellaneous Information: Aneroid Elevation 2000 ft. Maximum 3 ft. snow. Plenty timber and water for mining purposes. One and one-half miles of road would have to be built to the property.

Informant: J. E. Morrison. 10/20/38.

Sample submitted by J. E. Morrison, Mining Geologist—Grants Pass, Oregon

Sample description Following are the results of assays made on samples from the property of Mr. Pennell:

The assay results given below are made without charge as provided by Chapter 176, Section 10, Oregon Laws 1937, the sender having complied with the provisions thereof. NOTICE: The assay results given below are from a sample furnished by the above named person. This department had no part in the taking of the sample and assumes no responsibility, other than the accuracy of the assay of the material as furnished it by the sender.

Assayer
The law passed by the Legislature, governing the free assaying and analyzing of samples sent to a State Assay Laboratory, provides that certain information be furnished to the Laboratory regarding samples sent for assays, etc. A copy of the law will be found on the back of this blank. Please read the law carefully. Will you please fill in the information called for in the following blank, as far as possible, and return the same to the nearest State Assay Laboratory, along with your sample. If you have made out a blank, this copy is for your future use. Keep a copy of the information on each sample for your own reference.

Your name in full: [Signature]
Postoffice address: [Signature]

Are you a citizen of Oregon?. Date on which sample is sent: 10/1/38
Name (or names) of owners of the property: W.G. Pennell, Estate.
Name of particular claim and date of location:

Location of property or source of sample:
(3) Township. 30 S. (4) Range. 20 W. (5) Section. 27
(6) Quarter Section. N.E.

How far from passable road? [Signature]. For what do you wish sample tested? Gold.

Does your sample represent a new discovery? No.
On a newly located claim? No. Old?

Has any ore from this claim been milled or shipped? Yes.

Width of ore where sample was taken (length of channel cut): 4. Samples.

Remarks: The Department would be pleased to have you add to the above, such information as you think would be of interest and value. Use the reverse side of this sheet or a separate sheet. This could best be shown by a pencil sketch, indicating the development on the claim with the widths of vein, especially the width of ore at the place where this sample was taken.

A sample, to be of value, should be taken in an even channel across the vein from wall to wall. Its position in the workings should be marked and the width measured. Assays of unlocated samples, without widths, are of little value. They create but little interest in the minds of experienced investors and engineers.
