Re: Grassy Mountain – Baseline Data Report – Surface Water - Response

(Sent via e-mail to nancy@paramountnevada.com and US Mail - return receipt requested)

Dear Ms. Wolverson:

Calico filed its revised surface water baseline data report, prepared by SPF Water Engineering, with the State on August 14, 2018. The baseline data report has been reviewed by the Oregon Department of Environmental Quality, Oregon Water Resources Department, the Oregon Department of Fish and Wildlife and the Department of Geology and Mineral Industries.

After much interagency consultation, careful review, and revision efforts by SPF, the State confirms that the baseline information is consistent with the approved baseline data methodologies incorporated in the approved *Environmental Baseline Study Work Plans* dated September 22, 2017 (approved by the State of Oregon on December 7, 2017). Therefore, the Surface Water Baseline Data report is now approved.

Please let me know if you have any questions regarding the State's review and comments.

Sincerely,

Randy Jones
Chemical Process Mining Coordinator
Oregon Department of Geology and Mineral Industries
