## HISTORY OF OIL OR GAS WELL

(Submit in duplicate)

STATE DEPARTMENT OF GEOLOGY  
& MINERAL INDUSTRIES

In compliance with rules and regulations adopted pursuant to ORS 520.095 (Chapter 667 OL 1953)

Operator Ivan J. Vojvoda Field Unnamed  
Well No. Barr #1 , Sec. 32 , T. 11 S. R. 1 W. W.B. & M.  
Signed *Kenneth C. Hill*  
Date December 7, 1966 Title Agent and Engineer Retained  
(President, Secretary or Agent)

It is of the greatest importance to have a complete history of the well. Use this form in reporting the history of all important operations at the well, together with the dates thereof, prior to the first production. Include in your report such information as size of hole drilled to cementing or landing depth of casings, number of sacks of cement used in the plugging, number of sacks or number of feet of cement drilled out of casing, depth at which cement plugs started, and depth at which hard cement encountered. If the well was dynamited, give date, size, position and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position and results of pumping or bailing.

1966  
10-23 Owens Well Service moved in and rigged up. Installed blowout equipment. Drilled out surface plug and cleaned out to 3950' using water to circulate. Mixed mud.

10-24 Milled section of 5-1/2" casing from 3900' to 3934' using Servco section mill. Circulated hole clean. Made up and ran in with Servco hole opener.

10-25 Opened hole to 9" from 3900' to 3934'. Pumped in and equalized 35 sacks construction cement through open end drill pipe hanging at 4040'. (Construction cement, 35 sacks, 7 sacks sand, 100 lbs. CaCl.) Standing cemented.

10-26 Felt for plug - no good. Pumped in and equalized 35 sacks cement, 7 sacks sand, 100 lbs. CaCl through open end drill pipe hung at 3935'. Pulled up to 3800' and reversed out excess. Cement in place 7:30 A.M. Cleaned out hard cement to 3906'.

10-27 Ran retrievable whipstock and attempted to drill off; made 2' down face of whipstock. Ran hole opener and opened hole. Re-ran whipstock and attempted to drill off. Made 2' more down face of whipstock.

10-28 Ran hole opener and opened hole. Pilot broke off hole opener. Left same in hole. Made up junk basket. Milled over and recovered fish. Made up and ran bit on drill pipe and drilled ahead to 3911'. Could not make any more hole.

10-29 &  
10-30 Wait on orders.

10-31 Made up diamond point bit and cleaned out to 3941' inside casing stub.

11-1 Ran in and set permanent whipstock (slips set in stub of 5-1/2" at 3934'). Ran tapered mill and milled down face of whipstock with 3-7/8" mill. Ran 4-3/4" mill.

Date

1966

- 11-2 Opened hole to 4-3/4" and drilled ahead to 3937'. While wiping dog leg jumped pin at top of mill. Wait on fishing tools. Made two runs with 4-1/4" overshot. Tried to work over fish. No recovery on either run. Decision to abandon.
- 11-3 Ran in hole and came out laying down 2-7/8" drill pipe. Placed 10' top cement plug in 5-1/2" casing using about 25 sacks construction cement. Plug witnessed by K. C. Sills, Engineer, and R. J. Graham, drilling foreman.

Well abandoned.
