Date 10/20/57

Title Secretary

(President, Secretary or Agent)

It is of the greatest importance to have a complete history of the well. Use this form in reporting the history of all important operations at the well, together with the dates thereof, prior to the first production. Include in your report such information as size of hole drilled to cementing or landing depth of casings, number of sacks of cement used in the plugging, number of sacks or number of feet of cement drilled out of casing, depth at which cement plugs started, and depth at which hard cement encountered. If the well was dynamited, give date, size, position and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position and results of pumping or bailing.

Date

1/30/57

15 foot cement plug on top of cave-in at 274 ft.

20 foot " from 3' below surface.

Mud fluid between cement plugs separated by wooden plug.

45' of 8" casing cut off 3' below the surface left in the ground with additional cement around the outside at the top.

Plate on top of casing.

13 sacks of cement used.

10/17/57

Notified Dept. of intention to resume operations

10/21/57

Set up rotary air, encountered cave-in at 274 feet, circulated with brine and cement.

10/22/57

Circulated air, warning, not to barge with cave-in.

10/25/57

Contacted Dept. by phone, described conditions and gave notice of log and was given permission to plug according to outlined plan subject to submission of written reports.
