STATE OF OREGON
DEPARTMENT OF GEOLOGY AND MINERAL INDUSTRIES
HISTORY OF OIL OR GAS WELL
(In compliance with Oregon and federal regulations concerning oil and gas wells)

Operator: Willamette Paper Company
Locality: Siletz, Lincoln County

WELL No. 1, Siletz

No. of Feet Drilled: 4,067

Drillers: James H. Davis

Well Type: Oil

Depth at Surface: 57 feet

Depth at Top of Gypsum: 300 feet

Production Data:

date | production
--- | ---
August 22, 1949 | Open well, circulation down through the well, gas and water. Gas production 20,000 cub. ft. per day. Water production 10,000 gal. per day. Gas production 25,000 cub. ft. per day. Water production 20,000 gal. per day.
September 15, 1949 | Open well, circulation down through the well, gas and water. Gas production 20,000 cub. ft. per day. Water production 10,000 gal. per day. Gas production 25,000 cub. ft. per day. Water production 20,000 gal. per day.
October 15, 1949 | Open well, circulation down through the well, gas and water. Gas production 20,000 cub. ft. per day. Water production 10,000 gal. per day. Gas production 25,000 cub. ft. per day. Water production 20,000 gal. per day.

Additional Notes:

- The well was originally drilled for gas and water production.
- The operations were conducted in compliance with federal regulations.
- Regular testing and maintenance were performed to ensure safety and efficiency.

Conclusion:

The well was successfully drilled and operated as per regulatory standards. Regular testing and maintenance were performed to ensure the well's safety and efficiency. The well remains a valuable resource for both gas and water extraction.
