HISTORY OF OIL OR GAS WELL

(Submit in duplicate)

In compliance with rules and regulations adopted pursuant to ORS 520.095 (Chapter 667 OL 1953)

Operator    **Oregon Petroleum Co**                                      Field    **Clarno Area**  
Well No.    **Clarno 1**                                      , Sec. **27**                      , T. **7S**                      R. **19E**                                      **W.B. & M.**

Date    **November 27, 1957**                                      Signed    **(History written from tour reports by  
V.C. Newton, State Dept of Geology)**  
Title                                      **(President, Secretary or Agent)**

It is of the greatest importance to have a complete history of the well. Use this form in reporting the history of all important operations at the well, together with the dates thereof, prior to the first production. Include in your report such information as size of hole drilled to cementing or landing depth of casings, number of sacks of cement used in the plugging, number of sacks or number of feet of cement drilled out of casing, depth at which cement plugs started, and depth at which hard cement encountered. If the well was dynamited, give date, size, position and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position and results of pumping or bailing.

Date	If plugs or bridges were put in to test for water, state kind of material used, position and results of pumping or bailing.
8/23/57	Spudded 8:30 AM August 23, 1957. Drilled 13 3/4" hole to 475'. <u>10 3/4" casing cemented at 475' with 300 sacks on August 8, 1957.</u>
8/27/57	Installed BOP and rigged up. Drilled mouse hole. Drilled 9" hole to 635'.
8/28/57	Pumped clabbered mud out of the hole and changed to new mud. Drilled 9" hole to 1223'
8/29/57	<u>Lost two hours conditioning mud.</u> Drilled 9" hole to 1724'.
8/30/57 to 9/4/57	Drilled 9" hole to 2932'. Having trouble with heavy mud. Using gel mud.
9/5/57	Drilled 9" hole to 3108'.
9/7/57 to 9/13/57	Drilled 9" hole to 4250' T.D. Pulled out of the hole laying down drill-pipe.
9/14/57	Pulled surface casing (casing was cemented ?). Bridged the hole with cobbles, put a 10"X10"X10' timber in the hole. Placed a cement plug on top.

Taken from the Colorado-Wyoming Drilling Co tour sheets.
