HISTORY OF OIL OR GAS WELL

(Submit in duplicate)

In compliance with rules and regulations adopted pursuant to ORS 520.095 (Chapter 667 OL 1953)

Operator Standard Oil Company of California
Field Wildcat

Well No. Pexco State #1

Sec. 36 T. 20S R. 20E W.B. & M.

Signed (L. E. McMichael)
Title Area Exploration Supervisor
(President, Secretary or Agent)

It is of the greatest importance to have a complete history of the well. Use this form in reporting the history of all important operations at the well, together with the dates thereof, prior to the first production. Include in your report such information as size of hole drilled to cementing or landing depth of casings, number of sacks of cement used in the plugging, number of sacks or number of feet of cement drilled out of casing, depth at which cement plugs started, and depth at which hard cement encountered. If the well was dynamited, give date, size, position and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position and results of pumping or bailing.

Spudded inside of 22' of 20" conductor pipe on 8-18-55.

Drilled 9-7/8" hole to 1007'.

Reamed 17½" hole to 1007'.

Cemented 1007' of 13-3/8" casing at 1007' with 750 sacks construction cement.

Drilled 9-7/8" hole to 7594'. No zones of fluid or shows of any economic interest were encountered.

Made one Johnston Fm. test from 7260' - 7378'. Tool open 1 hr. Recovered 30' drilling mud. Puff blow when tool opened, then dead remainder of test.

Abandoned 12-10-55 with a 370' (285 sacks of construction type cement) plug across the shoe from 1040' to 670'.

A final lineal 15' plug of cement was poured in the top of the casing. A steel plate was welded over the casing and a 2" pipe left sticking up to mark the exact location. Well abandoned 12-10-55.
