

PUBLICATIONS CENTER: FREQUENTLY ASKED QUESTIONS

How do I search Publications Center?

Search from the [Publications Search](#) page. The keyword search will return results from titles only, not text within the publication, for most publications. Broad search terms tend to work best if you're not sure what you're looking for. The "publication type" drop-down and date range can help narrow down results.

Do I need permission to use DOGAMI publications?

Oregon Department of Geology and Mineral Industries publications are considered to be in the public domain, so specific permission to use them is not required. We do ask that the author and DOGAMI be credited as the source of the material. Suggested credit is: XYZ Title by Author Name, courtesy of Oregon Department of Geology and Mineral Industries.

Can you mail me a copy of a publication?

DOGAMI no longer provides hard copies of its publications by mail.

How can I find out about new publications?

Sign up for our [publications list-serv](#) to receive announcements of new publications by email.

How do I get a map printed?

DOGAMI no longer prints and sells maps, but our maps and other large-format publications are downloadable at high resolutions and ready to be printed. Contact a map printing or other printing company for a cost estimate.

How do I report a problem with a publication or with the Publications Center?

Please send comments, errors, bug reports, suggestions for improvements, questions, and any other communications to us at dogami-info@oregon.gov. We appreciate your feedback and will respond as promptly as possible.

I can't find what I'm looking for, can you help?

Yes! Email us at dogami-info@oregon.gov, or call our Portland office at 971-673-1555 if you need help locating a DOGAMI publication.

Are there other resources for information about Oregon's geology?

The USGS Publications Warehouse also has information on Oregon's geology and geologic hazards. It's available at <https://pubs.er.usgs.gov>
