

Willamette River Historic Channels, North of Corvallis, Oregon

L I D A R *Revealing Oregon's Dynamic Landscape*

The Willamette River and its former channels near Corvallis, Oregon. For thousands of years, the Willamette River wandered widely across the valley floor. Only in recent times have humans managed to confine it to a single course. This 3D enhanced image was created using a combination of lidar-derived elevation data and aerial orthophotography.
2010 Oregon Department of Geology and Mineral Industries Lidar imagery and graphic design by Daniel Coe
