INTRODUCTION

This bibliography was compiled in connection with the preparation of Hydrocarbon Exploration and Occurrences in Oregon, published by the Oregon Department of Geology and Mineral Industries (DOGAMI) as Oil and Gas Investigation 15 (OGI-15), and is being released concurrently as a supplement to that report.

Whereas DOGAMI OGI-15 contains a list of only the references cited, this bibliography is an effort to provide a comprehensive listing of references relevant to oil and gas exploration in Oregon. It is not intended to be exhaustive but includes most of the relevant citations in the literature that are known to the author.

The bibliography consists of two parts: an author list and a county index. To help locate references for a specific area, pertinent citations are listed under the respective county in an abbreviated form that refers back to the author list. Entries covering large or diverse areas are not listed in the county index.
