The tsunami scenarios presented on this map can be found in DOGAMI's work. Higher energy directed toward the Oregon coast than other Alaskan selected source locations on the Aleutian chain of islands also shows Oregon tide gauges since 1854. The most severe was generated by the 2011 Distant earthquake/tsunami events that have affected the Oregon coast: to travel the Pacific Ocean and arrive onshore in Oregon (Figure 2). The Ring of Fire but not directly off the Oregon coast, they take more time stretching from New Zealand, along the eastern edge of Asia, north CA to CA through the Aleutian Islands of Alaska, and south along the coast of 62°20'0"N 42°22'0"N. The computer simulation model output is provided to DOGAMI as help cities, counties, and other sites in coastal areas reduce the...
