**IF YOU FEEL AN EARTHQUAKE:**
- Drop, cover, and hold
- Move immediately inland to higher ground
- Do not wait for an official warning

**SI USTED SIENTE EL TEMPLOR:**
- Tirese al suelo, cúbrase, y espere
- Diríjase de inmediato a un lugar más alto que el nivel del mar
- No espere por un aviso oficial

**OUTSIDE HAZARD AREA:** Evacuate to this area for all tsunami warnings or if you feel an earthquake.

**LOCAL CASCADIA EARTHQUAKE AND TSUNAMI:** Evacuation zone for a local tsunami from an earthquake at the Oregon coast.

**DISTANT TSUNAMI:** Evacuation zone for a distant tsunami from an earthquake far away from the Oregon coast.

**ZONE DE PELIGRO EXTERIOR:** Evace a esta área para todas las advertencias del maremoto o si usted siente un temblor.

**MAREMOTO LOCAL** (terremoto de Cascadia): Zona de evacuación para un tsunami local de un temblor cerca de la costa de Oregon.

**MAREMOTO DISTANTE:** Zona de evacuación para un tsunami distante de un temblor lejos de la costa de Oregon.

---

This tsunami evacuation zone map was developed by DOGAMI for the purpose of evacuating the most effective means to guide the public in the event of a tsunami evacuation. The map is based on preliminary data and should not be used for site-specific planning. This map adopts recommendations from the Oregon Tsunami Advisory Team and has been reviewed by City Managers, City Councils, and local emergency officials and reviewed by the Oregon Department of Emergency Management.

**HUNTER CREEK AREA**
If you feel an earthquake, a tsunami may be coming...

WHAT TO DO:

• DROP, COVER, HOLD until the earthquake is over; protect yourself (see chart) (a)

• MOVE IMMEDIATELY INLAND to high ground and away from low-lying coastal areas (a)

• FOLLOW EVACUATION ROUTE SIGNS (b)

• DO NOT WAIT for an official warning (b)

• DO GO ON FOOT if at all possible (b)

• DO NOT PACK or delay (b)

• DO NOT RETURN to the beach – large waves may continue to come onshore for several hours (b)

• WAIT for an “all clear” from local emergency officials before returning to low-lying areas (b)

A tsunami is a large wave resulting from displacement of the ocean floor. It can travel far distances and can cause great loss of life and property damage. A tsunami may be generated by an undersea earthquake near the Oregon coast or by a distant undersea earthquake far away from the coast.

Local tsunamis cause great loss of life and property damage. A local tsunami can come onshore within a few minutes of the earthquake. It is unlikely that anyone will help you, so make a plan in advance to be self-sufficient. Keeping essential emergency supplies handy can save your life – please read it and share it.

In case of an earthquake:

1. Evacuate quickly! Shaking from the earthquake may be the only warning you have.

2. If you think you have special skills and can help, or if you need help evacuating, tie something white to make it large enough to be visible from the street. If the emergency is a tsunami, it is unlikely that anyone will help you, so make a plan in advance to be self-sufficient. Keep essential emergency supplies handy! It could save your life.

2. Stay away from potentially hazardous areas until you receive an ALL CLEAR from local officials. Tsunamis often follow river channels, and dangerous waves can persist for several hours. Distant tsunamis can come onshore within several minutes after the earthquake. Typically, there is time for an official warning and evacuation to safety. Evacuation for a distant tsunami will generally be indicated by a national warning system. Ground shaking from the earthquake may be smaller than that from a local earthquake. Typically, there is time for an official warning and evacuation to safety. The distance from the undersea earthquake to Oregon is usually enough to be visible from the street. If an ALL CLEAR is given, leave the tsunami zone quickly. For more information, please refer to your local broadcast media or NOAA weather radio.

DO WHAT TO DO FOR BOTH LOCAL AND DISTANT TSUNAMIS:

1. Evacuate on foot, if at all possible.

2. If you need help evacuating, tie something white to make it large enough to be visible from the street. If the emergency is a tsunami, it is unlikely that anyone will help you, so make a plan in advance to be self-sufficient. Keep essential emergency supplies handy! It could save your life.

3. Stay away from potentially hazardous areas until you receive an ALL CLEAR from local officials. Tsunamis often follow river channels, and dangerous waves can persist for several hours. Distant tsunamis can come onshore within several minutes after the earthquake. Typically, there is time for an official warning and evacuation to safety. Evacuation for a distant tsunami will generally be indicated by a national warning system. Ground shaking from the earthquake may be smaller than that from a local earthquake. Typically, there is time for an official warning and evacuation to safety. The distance from the undersea earthquake to Oregon is usually enough to be visible from the street. If an ALL CLEAR is given, leave the tsunami zone quickly. For more information, please refer to your local broadcast media or NOAA weather radio.

4. After evacuation, check with local emergency officials if you think you have special skills and can help, or if you need help evacuating, tie something white to make it large enough to be visible from the street. If the emergency is a tsunami, it is unlikely that anyone will help you, so make a plan in advance to be self-sufficient. Keep essential emergency supplies handy! It could save your life.
