IF YOU FEEL AN EARTHQUAKE:
• Drop, cover, and hold
• Move immediately inland to higher ground
• Do not wait for an official warning
SI USTED SIENTE EL TEMBLOR:
• Tírese al suelo, cúbrase, y espere
• Diríjase de inmediato a un lugar más alto que el nivel del mar
• No espere por un aviso oficial

OUTSIDE HAZARD AREA: Evacuate to this area for all tsunami warnings or if you feel an earthquake.
ZONA DE PELIGRO EXTERIOR: Evacúe a esta área para todas las advertencias del maremoto o si usted siente un temblor.

LOCAL CASCADIA EARTHQUAKE AND TSUNAMI: Evacuation zone for a local tsunami from an earthquake at the Oregon coast.
MAREMOTO LOCAL (terremoto de Cascadia): Zona de evacuación para un tsunami local de un temblor cerca de la costa de Oregon.

DISTANT TSUNAMI: Evacuation zone for a distant tsunami from an earthquake far away from the Oregon coast.
MAREMOTO DISTANTE: Zona de evacuación para un tsunami distante de un temblor lejos de la costa de Oregon.

MAP SYMBOLS / SÍMBOLOS DEL MAPA

Evacuation route / Ruta de evacuación
Assembly area / Área reunión
Bridge / Puente
Fire Department / Bomberos
Trail / Sendero

Elevation, in feet / Elevación, en pies

SCALE / ESCALA

0.25 mile
0.4 km

NOTICE
This tsunami evacuation zone map was developed by DOGAMI for the purpose of evaluating the most effective means to guide the public in the event of tsunami evacuation. The map is based on preliminary data and should not be used for site-specific planning. This map adopts recommendations from the Oregon Tsunami Advisory Council. The evacuation routes were developed by local emergency officials and reviewed by the Oregon Department of Emergency Management.
If you feel an earthquake, a tsunami may be coming...

WHAT TO DO:
• DROP, COVER, HOLD until the earthquake is over; protect yourself
• MOVE IMMEDIATELY INLAND to high ground and away from low-lying coastal areas
• FOLLOW EVACUATION ROUTE SIGNS
• DO NOT WAIT for an official warning
• DO ON FOOT if at all possible
• DO NOT PACK or delay
• DO NOT RETURN to the beach – large waves may continue to come onshore for several hours
• WAIT for an “all clear” from local emergency officials before returning to low-lying areas

WHAT TO KNOW about Tsunamis

1. Evacuation for a local tsunami will generally be indicated by the warning, “BE PREPARED!” – heard on your local radio or television. This means you need to get to high ground or inland immediately. Be prepared to evacuate on foot if at all possible and do not wait for an official warning.

2. Evacuation for a distant tsunami will generally be indicated by an announcement over NOAA weather radio that the local area has been put into an official TSUNAMI WARNING. If you do not hear an announcement, a sudden change of sea level should prompt you to move immediately to high ground. If you see a sudden sea level change, first evacuate away from shoreline areas, then turn on your local broadcast media or NOAA weather radio for more information.

Distant Tsunamis

• A local tsunami is generated by an earthquake near the coast (a local earthquake). As tsunamis enter shallow water near land, they increase in height and can cause great loss of life and property damage. Typically, there is time for an official warning and evacuation to safety. Evacuate quickly!

• A distant tsunami is generated by an undersea earthquake far away from the coast (a distant earthquake). As tsunamis enter shallow water near land, they increase in height and can be smaller than that from a local earthquake. Typically, there is time for an official warning and evacuation to safety. Evacuation for a distant tsunami will generally be indicated by an announcement over NOAA weather radio that the local area has been put into an official TSUNAMI WARNING. If you do not hear an announcement, a sudden change of sea level should prompt you to move immediately to high ground. If you see a sudden sea level change, first evacuate away from shoreline areas, then turn on your local broadcast media or NOAA weather radio for more information.
