If you feel an earthquake, a tsunami may be coming...

WHAT TO DO:
- DROP COVER, HOLD until the earthquake is over — protect yourself
- MOVIE IMMEDIATELY to high ground and away from low-lying coastal areas
- FOLLOW EVACUATION ROUTE SIGNS
- DO NOT WAIT for an official warning
- GO ON FOOT if at all possible
- DO NOT RETURN to the beach — large waves may continue to come on shore for several hours
- WAIT for “all clear” from local emergency officials before returning to low-lying areas

1. Return to “normal” activities when safe
2. In case of mudflow, travel uphill and away from valleys, canyons and stream channels
3. Expect aftershocks — be prepared
4. In a natural disaster, remember — safety comes first
